Speaker Disclosure for Recording of Presentations Release & Authorization

This year, the Canadian Geriatrics Society (CGS) will allow a company called MultiView to content capture sessions at the Annual Scientific Meeting. I hereby grant MultiView and the CGS the right to make a screen captured recording of my speech and use associated material (PowerPoint, handouts and/or video files) in the publishing of event-based materials for/from the event described above for distribution in any media format (i.e. webinar) for use in all domestic and foreign markets on behalf of the CGS. The CGS may use some or all of these components either in whole or in part, synchronized or not. I understand and represent that I have the right to grant such permission based on copyright law and that I have obtained permission to use any third-party material for the purposes as set out herein.

The CGS provides presenter laptops for use during the presentation, however, I understand that if I choose to use my own laptop or desktop computer, it may be necessary for MultiView to access my system to capture the required presentation. I hereby grant permission to MultiView the right to access my hard drive and understand that MultiView will no longer have access after the presentation ends. I acknowledge that I shall receive no compensation for this recording. I may, however, request and receive a complimentary copy of any product that includes materials from my presentation. I hereby indemnify and hold harmless the CGS its directors, officers, agents, employees, clients and all other stakeholders from all copyright claims of every kind on account of such use.
